G.V.D. CAMPBELL
Duke of ARGYLL

Argyll Lodge, Kensington.

Feb 12/96

Dear Professor Heddle

I am not sure how far or in what form, if at the Imperial Institute as Chancellor to interfere in the question of detail about the

known basalt 6 miles up Glen Coe - from which shot if must have been ice-borne

& Iona

Do you know the mineral? and if so could you see me & direct a specimen? The point is important in the glacial theories after
